

This is the entire tap assembly Kit for these models :

- Ascaso Dream boiler with thermoblock made after +11/2008
- Ascaso Dream boiler group prior -10/2009

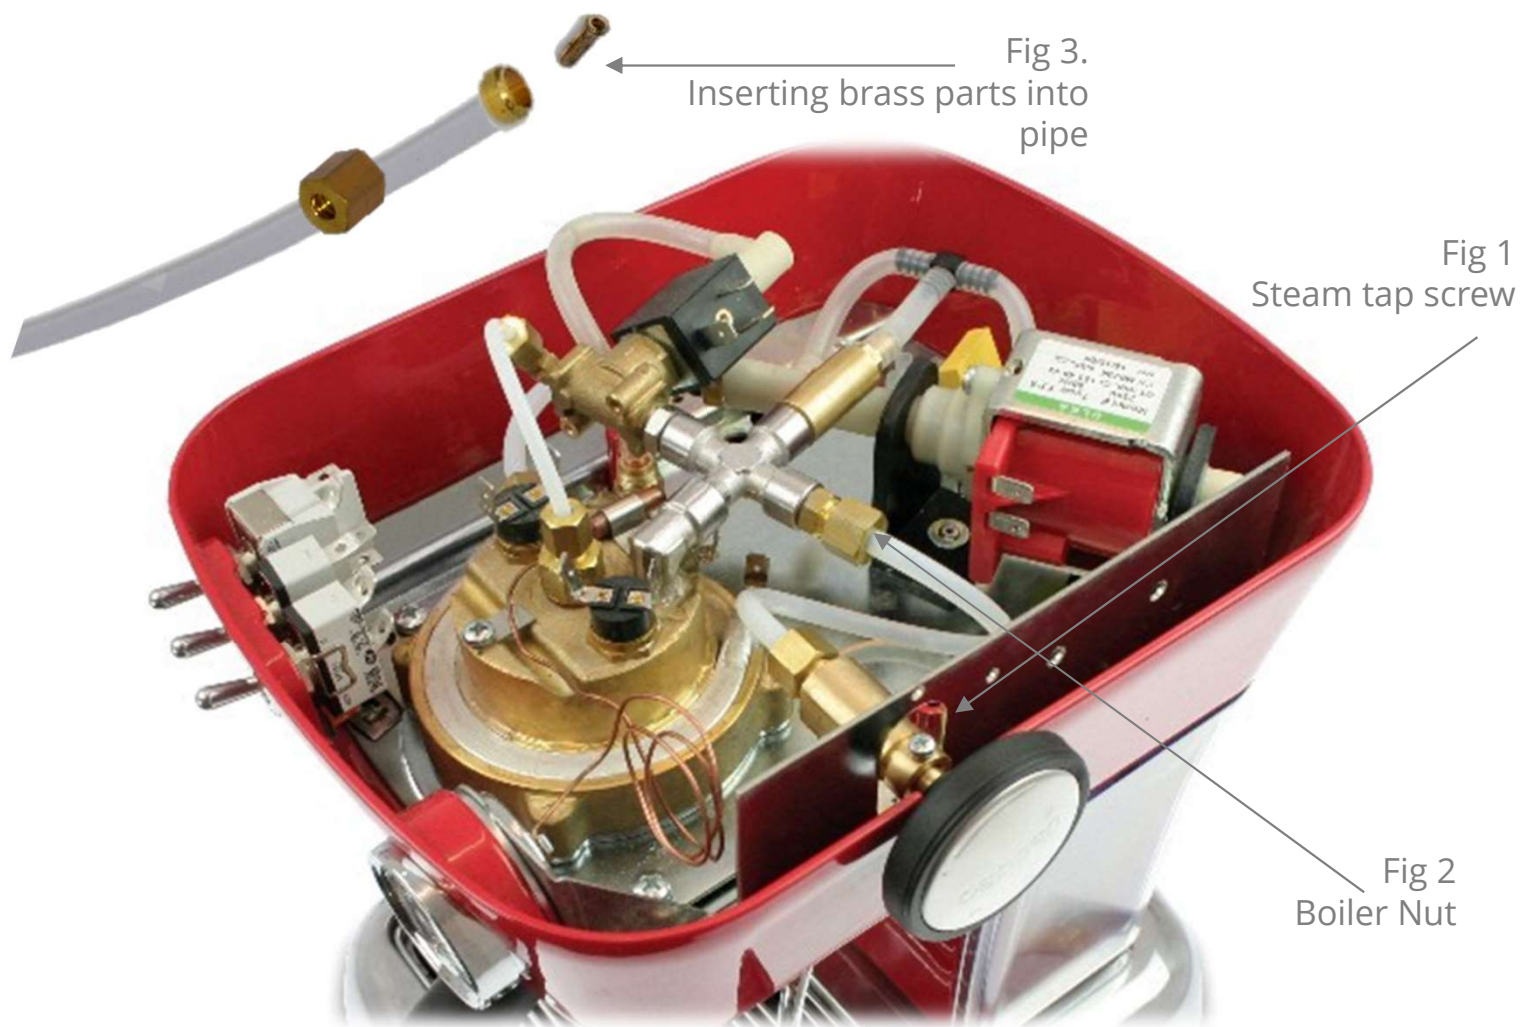

Kit 208 # 5601

Replacing the Tap kit:

This looks difficult to do, but it is very easy, you will need a spanner set and 10 min.

1. Plug out machine.
2. Make sure machine is cold before you do this
3. Remove top, unscrewing 2 long screws underneath, near the coffee group.
4. Remove steam tap knob - using a screwdriver Fig.1
5. Remove boiler nut, holding Teflon pipe in place, using a spanner as shown – Fig.2 Models vary
6. Finally fit kit starting with fitting the Teflon pipe to the new steam tap – Fig.3
Insert brass bolt 1sr, then o ring on Teflon pipe, insert brass insert into Teflon pipe, insert pipe into steam pipe, tighten nut.
7. Repeat for the other end of the Teflon pipe and tighten.
8. After you have replaced the kit and pipe - turn on machine to see if there any leaks, tighten nuts is this happens.
9. All ok put lid back on and make your self a coffee - You earned it..!!

542. Kit 208

for coffee lovers

SPARE PARTS

Disclaimer: This intended as a guide only. We accept no responsibility for physical or personal damage .

If you feel that you may not be able to carry out the repair your self, contact a repair centre.

Plug out machine before you attempt any repairs.

Remove 2 long screws to open the top of your coffee machine

Helpful tools:

You will need a spanner set, a Philips Screwdriver and a socket set, (depending on the tap kit)
